

## Pre-EduBot Preparation Worksheet

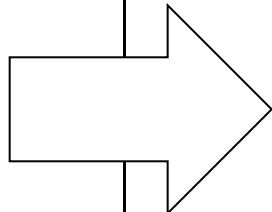

### Step 1 – Spot challenges

Write down 2–3 problems, waste points, or inefficiencies you notice in your sector.

### Step 2 – Imagine a service approach

For each problem, think: how could it be solved if it were offered as a service instead of just a product or one-time service?

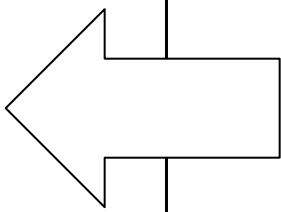

Write at least 1 possible service idea for each identified problem.

---

### Step 3 – Pick & refine

Choose 1 idea that feels most useful, realistic, or interesting to explore further in the EduBot.
